

**The Anticancer Effects of Yanhusuo San:
Mechanism of Actions Study**

A dissertation presented

by

Jian-Li Gao

to

The Institute of Chinese Medical Sciences

in partial fulfillment of the requirements

for the degree of

Doctor of Philosophy

in the subject of

Biomedical Sciences

University of Macau

Macao SAR, China

May 2009

Table of contents

Abstract	i
Table of contents	iii
Acknowledgements	viii
Achievements	ix
List of Figures	xii
List of Tables	xv
Abbreviation	xvii
Preface	xx
Chapter 1. Review on cancer metastasis, angiogenesis and Yanhusuo San	1
1.1 The background of cancer	1
1.1.1 Metastasis	2
1.1.2 Tumor angiogenesis	11
1.1.3 Synergistic study of antitumor effect	16
1.2 Overview of Yanhusuo San	17
1.2.1 Overview of Yanhusuo (Rhizoma Corydalis)	17
1.2.2 Overview of Ezhu (Rhizoma Curcumae)	22
1.3 Systems biology and systems pharmacology	23
1.3.1 Outline of systems biology and systems pharmacology	24
1.3.2 Application of systems biology in CMF	24
1.4 Conclusion	25
Chapter 2. Effects on cell proliferation	30
2.1 Introduction	30
2.2 Materials and methods	32
2.2.1 Reagents	32
2.2.2 Cell lines and culture	32

2.2.3 Preparation of extract and chemical analysis	33
2.2.4 MTT assay	36
2.2.5 Cell cycle analysis	36
2.2.6 Cytochrome c release in cytosol	36
2.2.7 Analysis of mitochondrial membrane potential	37
2.2.8 NBT reduction assay	37
2.2.9 RNA isolation and real-time PCR analysis	38
2.2.10 Data analysis	38
2.3 Results	38
2.3.1 Results for Yanhusuo and its ingredients	38
2.3.2 Results for Ezhu and its ingredients	46
2.4 Brief summary	50
Chapter 3. Effects on cell adhesion	53
3.1 Introduction	53
3.2 Materials and methods	54
3.2.1 Reagents and materials	54
3.2.2 Cell lines and culture	54
3.2.3 Heterotypic cell adhesion	55
3.2.4 Homotypic cell adhesion	55
3.2.5 Heterophilic adhesion	56
3.2.6 Western blotting	56
3.3 Results	57
3.3.1 Results for bFGF, EGF and VEGF on cell adhesion	57
3.3.2 Results for TPA on cell adhesion	59
3.3.3 Results for Yanhusuo and protopine on cell adhesion	63
3.3.4 Results for Ezhu extract	68
3.4 Brief summary	69

Chapter 4. Effects on cell invasion	72
4.1 Introduction	72
4.2 Materials and methods	73
4.2.1. Reagents and materials.....	73
4.2.2. Cell lines and culture.....	73
4.2.3. Two-dimensional cell migration assay.....	74
4.2.4. Three-dimensional cell migration assay.....	74
4.2.5. Cell invasion assay.....	75
4.2.6. Western blotting	75
4.2.7. Gelatin zymography	76
4.2.8. RNA isolation and real-time PCR analysis.....	76
4.2.9. Statistical analysis	77
4.3 Results.....	77
4.3.1 Results for Yanhusuo and its ingredients	77
4.3.2 Results for Ezhu and its ingredients.....	82
4.4 Brief summary.....	84
Chapter 5. Synergic anti-proliferative effect of Yanhusuo and Ezhu on MDA-MB-231 cells	88
5.1 Introduction.....	88
5.2 Materials and methods	89
5.2.1. Materials.....	89
5.2.2. Cell lines	90
5.2.3. Evaluation of cytotoxicity	90
5.2.4. Evaluation of combination effect by CI method.....	90
5.2.5. Evaluation of combination effect by isobologram methodology.....	91
5.2.6. Evaluation of combination effect by modified coefficient of drug interaction (CDI).....	91
5.2.7. Cell invasion assay.....	92

5.2.8. Cell cycle analysis.....	93
5.2.9. Apoptosis analysis.....	93
5.2.10. Western blotting.....	94
5.2.11. Statistical analysis.....	94
5.3 Results.....	94
5.3.1. Synergic anti-proliferative effect of Yanhusuo and Ezhu extract on MDA-MB-231 cancer cell.....	94
5.3.2. Synergic anti-proliferative effect of berberine, DHC and THP on MDA-MB-231 cancer cell.....	100
5.4 Brief summary.....	105
Chapter 6. Effects on tumor angiogenesis.....	111
6.1 Introduction.....	111
6.2 Materials and methods.....	112
6.2.1 Reagents and materials.....	112
6.2.2 Cell culture.....	113
6.2.3 Sample preparation and analysis.....	113
6.2.4 Proliferation assay.....	114
6.2.5 Cell migration assay.....	114
6.2.6 Cell invasion assay.....	114
6.2.7 HUVEC tube formation assay.....	115
6.2.8 Western blotting.....	115
6.2.9 Gelatin zymography.....	115
6.2.10 RNA isolation and real-time PCR analysis.....	116
6.2.11 Statistical Analysis.....	116
6.3 Results.....	117
6.3.1 Results for Yanhusuo and berberine.....	117
6.3.2 Results for Ezhu and its ingredients.....	123
6.4 Brief summary.....	124

Chapter 7. General conclusion	129
7.1 Summary of this study	129
7.2 Future directions of research.....	132
7.2.1 The method for synergic anticancer effect evaluation	132
7.2.2 The modification of cellular adhesion models	133
7.3 Closing remark.....	135
Appendix I Effects of Yanhusuo and Ezhu on cell viability	137
